Result-driven Software Engineer with 3+ years of industry experience across mobile, web, and full-stack ecosystems. Proven expertise in building scalable cross-platform applications, engineering robust ETL pipelines, and optimizing data infrastructure. Adept at leveraging AI, machine learning, and automation-driven solutions to streamline workflows and deliver high-performance digital products.

EDUCATION

National University of Computing and Emerging Sciences, Bachelor in Computer Science Lahore, Pakistan	CGPA 3.44	June 2026
Government College University, Intermediate in Computer Science	Marks 1033 / 1100	Aug 2022
Dar-E-Arqam School, Matriculation in Computer Science Lahore, Pakistan	Marks 1072 / 1100	Aug 2020

Achievements

Deans List Holder - FAST-NUCES	2022, 2023, 2025
1st Position holder - ECAT-ICS	2022
98% Marks in Matriculation (Board of Intermediate and Secondary Education)	2022
93% marks in Intermediate (Board of Intermediate and Secondary Education)	2020

EXPERIENCE

i2c Inc., Associate Software Engineer Full time (Lahore, Pakistan)	June 2026 - Continue
- Designed, developed, and maintained high-volume, transactional backend applications using Java and Spring Boot framework. - Wrote clean, efficient, and well-tested code adhering to OOP principles and solid backend architecture guidelines. - Collaborated with database administrators to design schemas and optimize complex SQL queries for relational databases. - Participated in code reviews, sprint planning, and daily stand-ups following Agile methodologies to ensure high-quality software delivery.	
Alphabridge, Associate Software Engineer Remote (Lahore, Pakistan)	Feb 2026 - June 2026
- Worked on Data engineering tools such as Databricks , Microsoft Fabrics etc. - Developed reports with D365 FNO.	
Folio3, Software Engineering Intern Hybrid (Lahore, Pakistan)	June 2025 - Aug 2025
- Nine weeks industry experience. - Worked on different stacks and gained hands on industry experience. - Developed a real-time React-Native mobile Application	
Analyzinn Solutions, Application Development Intern Remote (Lahore, Pakistan)	July 2024 - March 2025
- Nine months industry experience. - Led 2 person team in real-time iOS mobile Application Development. - Excelled in both SwiftUI and UIKit - Developed a real-time Android mobile Application using KOTLIN	
PrepVista, Web Development Intern Remote (Lahore, Pakistan)	june 2024 - July 2024
Contributed in a real-time web project.	

SKILLS

Languages	Java Script, C/C++, C#, Kotlin, Java, Swift, CMake, Matlab, Git, Mathematica, HTML , CSS, XML, SQL, Python
Software & Tools	Linux, Xcode , Android Studio , Unity, VSCode, Databricks, Microsoft Fabrics, Snowflake
Certifications	Unity Game Development – (2023)
Frameworks	ASP, SwiftUI , UIKit, JetpackCompose , React , React Native , SFML , Dot-NET, MERN (MSSQL, Express, React, Node), Pyspark, FastApi
Management Skill	Efficiently lead all the university group projects and Internship projects , meeting all the deadlines.

PROJECTS

Transit Ad-Campaign Monitoring Platform (Australian Transit Network)

April 2026 - June 2026

- Developed a high-performance admin dashboard using Next.js and Tailwind CSS, integrating interactive real-time telemetry to track and monitor ad campaign performance across a nationwide Australian bus network.
- Engineered a scalable, asynchronous backend using FastAPI to seamlessly process high-frequency geo-location and impressions data, ensuring rapid API response times and secure role-based access control.

Enterprise Retail Analytics Platform (US E-Commerce Client)

Feb 2026 - March 2026

- Architected and deployed an end-to-end data lakehouse using Microsoft Fabric, implementing a Medallion Architecture (Bronze, Silver, Gold Delta tables) via Fabric Data Pipelines and Spark Notebooks to consolidate disparate transactional and customer data streams into a single source of truth.
- Engineered optimized semantic models and advanced corporate BI dashboards in Power BI using DirectLake mode, delivering near real-time operational visibility, reducing dashboard load times, and providing stakeholders with actionable insights into seasonal revenue trends.

SkillSwap MERN

Sept 2025 - Dec 2025

- Developed a fully functional website in MERN stack.
- Handled web sockets to allow users to connect with each other.
- Skill based matchmaking for users.

Automated Scrum Master as an internship project

June 2025 - August 2025

- Developed a fully functional cross-platform mobile application using react-native.
- Efficiently managed responsive UI design and network requests.
- Automated the agile workflow using Ai agents and Gen Ai .

Fitness App as an SE (SoftwareEngineering) project

Feb 2025 - Jun 2025

- Developed a fully functional Fitness android app in Kotlin/Jetpack Compose.
- Efficiently managed responsive UI design and network requests.
- Advanced features such as computer vision and chatbot integration.

ARScanning iOS App as an open source project for a construction company

Dec 2024 - Feb 2025

- Developed a fully functional ARScanning iOS app in UIKIT.
- Efficiently managed responsive UI design and network requests.

Cross-Platform Native Lost & Found Application

Sept 2024 - Mar 2025

- Engineered a full-cycle social networking system, independently developing native client applications for both iOS (SwiftUI) and Android (Kotlin / Jetpack Compose) following strict MVVM architecture design patterns.
- Integrated Firebase for real-time data storage, synchronization, and low-latency in-app messaging, ensuring reactive UI updates and seamless data consistency across both mobile platforms.

Cross-Platform Native Islamic Application

July 2024 - March 2025

- Led a development team to design, build, and deploy native client applications for both Android (Kotlin) and iOS (SwiftUI), managing the full project lifecycle from initial requirements gathering to production release.
- Engineered robust data flow architectures and optimized RESTful API handling to deliver real-time features, utilizing Apple's latest programmatic navigation frameworks to ensure a fluid, high-performance user experience.

Health Monitoring App a real-time Android application for client using Native development (Kotlin/JetPack Compose)

Sep 2024 - Nov 2024

- Developed User Interface and backend code using best programming practices in Kotlin/Java.
- Testing various real time features , such as API handling and data flow logic.
- Handled Real time data updates.
- Real time data recording over bluetooth using a monitoring device.

Cinema Management System – as Database Project in ASP with .NET

Mar 2024 - Jun 2024

- Developed an entire cinema website with payment and ticketing system.
- Efficient backend and SQL database integration.
- Handled different views for Admin and customers through single website.
